

Communicating IT Audit Reports to Executives: From Audit To Action

Crossing the language divide between senior executives and internal auditors is important to ensure IT audit reports are understood and IT governance becomes a strategic business priority.

Yet when executives view the IT audit as little more than a cost of doing business, there is no motivation to take action beyond the minimum requirement of compliance.

What needs to change?

*“Insanity is doing the same thing over and over, expecting a different result”
Albert Einstein*

In this three hour, highly interactive program, amongst a group of your peers, you will learn proven, practical methods and begin to apply them to *your* specific organization. Methods on how to:

- Understand how CEOs think and exactly what is preventing them from understanding the business value of audit recommendations.
- Discover how to engage senior executives in internal control, right from the start, so they actually want to read the audit recommendations.
- Audit planning and audit recommendations that better align with the strategic business objectives of *your* company.
- Cross the senior executive to internal auditor communication barrier specific to *your* IT audit recommendations.
- Develop and deliver audit reports that CEOs will take action on.

**** Be prepared to bring a copy of your most recent IT audit report with you as we develop your personal action plan for better results!**
